PROFESSIONAL SUMMARY

Cyber security specialist and software engineer who builds secure, AI-driven systems from architecture to production. My work sits where cyber security, full-stack engineering, and autonomous AI meet, designing and deploying end-to-end solutions with security, scalability, and resilience built in from the start rather than added on at the end.

I design and implement AI agents, LLM orchestration, and automation pipelines that put intelligence directly into real operations, not proofs of concept but systems running in production. As founder of Awesome Services, I led the adoption of AI and workflow automation that improved operational accuracy by 90% and client retention by 96%. Today the business runs its invoicing and tax reporting almost entirely through AI agents such as Hermes, managed end to end from a phone.

Backed by professional certifications in AI, back-end, and full-stack development, I bring a practical, multidisciplinary perspective that combines security principles with hands-on engineering and real-world execution to build systems that are secure, intelligent, and efficient.

KEY SKILLS

Cyber Security & Network Defence: Cyber Threat Analysis, Vulnerability Management, Incident Response, SIEM Tools, Risk Management, Network Security, Firewall Configuration, Security Hardening, Web Application Security (WAF, Bot Detection, Rate Limiting), Authentication & Access Control (OAuth 2.1, SSO).

Software & Full-Stack Development: Full-Stack Development (Front-End and Back-End), System & Application Architecture, Modern Web Frameworks, REST & API Development and Integration, Relational Databases & Data Modelling, TypeScript, JavaScript, Python.

Artificial Intelligence & Automation: Agentic AI Systems, LLM Integration & Orchestration, AI Agent Implementation, Multi-Agent Workflows, MCP Servers & Gateways, Workflow Automation, Process Optimisation.

Cloud & Infrastructure: Cloud & Serverless Deployment, Edge Computing, Linux System Administration, Self-Hosting & VPS Management, Containerisation, Cloud Security Principles.

DevOps & Deployment: CI/CD Pipelines, Containerisation (Docker), Automated Deployment, Version Control Workflows (Git, GitHub), Environment & Secrets Management.

Data & Analytics: Data Mining, Data Analysis, Data Visualisation, Data-Driven Decision-Making.

Problem Solving & Collaboration: Debugging, Troubleshooting, Cross-Functional Communication, Continuous Improvement.

TECHNICAL PROJECTS

AI Billing Service | AI Systems Architect

Invoicing and financial-year tax reporting platform operated end to end by autonomous AI agents, cutting a full billing and reporting cycle to one message from a phone. Exposes 31 guarded tools over MCP and REST with OAuth 2.1 and per-agent keys, and enforces every financial rule (invoice numbering, GST, rate snapshots, financial-year cut-offs) inside PostgreSQL. Live in production for a real business. (billing.andreshenao.com.au)

The Watchtower | Security Engineer & AI Developer

Active-defence honeypot platform that fingerprints sessions, scores risk, and detects bots in real time at the network edge, backed by a WAF and a fully serverless, edge-native security architecture. (sentinel.andreshenao.com.au)

Project Intelligence System | Full-Stack Engineer & AI Architect

Shared context layer for AI tools: a PostgreSQL database designed as the interface that any AI assistant reads and writes through MCP, achieving 100% context persistence across tool switches. (intel.andreshenao.com.au)

Personal Portfolio & AI Assistant | Full-Stack Engineer & Designer

Secure, AI-powered portfolio running 24/7 with an autonomous conversational assistant over a PostgreSQL database, protected by WAF security middleware against automated bot threats. (cv.andreshenao.com.au)

PROFESSIONAL EXPERIENCE

Cyber Security Analyst Intern (Industry Project)

Employability Advantage, supported by AusBiz Consulting, Australia | Nov 2025 - Mar 2026

- Completed a 10-week hands-on Cyber Security (Cloud) industry project, securing AWS and Microsoft Azure environments against real-world vulnerabilities such as misconfigured storage, weak access controls, and vulnerable APIs.
- Implemented cloud access control and authentication with AWS IAM, Cognito, MFA, and Secrets Manager, and provisioned firewall-configured RDS databases.
- Secured APIs using Lambda, API Gateway, and API key management, and applied key management and mTLS with digital certificates.
- Set up monitoring and logging with AWS CloudWatch and demonstrated hands-on threat exposure through API and data-leak penetration testing.
- Collaborated through GitHub under Agile project management, accelerating tasks and vulnerability testing with GenAI tools.

Managing Director & Founder

Awesome Services, Sydney, Australia | Oct 2013 - Present

- Designed and implemented automation workflows with n8n and Python, improving operational accuracy by 90% and reducing administrative workload.
- Built an automated billing system that handles invoicing from a phone through an AI agent and generates tax reports on demand, keeping financial records accurate and up to date.
- Developed and deployed a customer service QA workflow, lifting client retention to 96% and improving overall satisfaction ratings.
- Led full business operations including client acquisition, workforce management, quality control, and financial oversight across multi-site operations.
- Built and trained cross-functional teams, enforcing service standards and safety compliance across all job sites.
- Handled all financial operations including budgeting, expense tracking, invoicing, payroll, and vendor payments.
- Analysed service trends, client feedback, and operational KPIs to continuously refine offerings and exceed customer expectations.

Logistics Specialist (Kemira Chemicals account)

Coordinadora Logistica Internacional, Bogota, Colombia | Jul 2008 - Mar 2013

- Served as in-house logistics specialist supporting Kemira Netherlands operations in Colombia, overseeing international transport and warehousing.
- Led the strategic design and implementation of the Logistics Support Warehouse (DAL) in Colombia, creating a regional hub that reduced international delivery times to Central American markets by over 50% and enabled new client acquisitions.
- Analysed shipping and warehouse data to identify inefficiencies, driving process improvements that increased on-time delivery rates and optimised stock distribution.
- Developed operational reports and interactive dashboards to enhance data visibility, cost forecasting accuracy, and carrier performance tracking.
- Managed coordination of national and international sea, air, and overland freight, ensuring compliance with customs and safety regulations.
- Negotiated rates and contracts with global carriers, reducing transportation costs and improving delivery timelines.
- Led the rollout and training of a new logistics management system, improving tracking precision and warehouse efficiency across multiple sites.

Account Manager

Coordinadora Logistica Internacional, Bogota, Colombia | Feb 2006 - Jun 2008

- Managed national and international client accounts across multiple industries, delivering tailored logistics and supply chain solutions aligned with business needs.

- Coordinated sea, air, and overland transport operations, ensuring on-time and cost-effective delivery while maintaining full compliance with international trade regulations.
- Oversaw daily operations across multiple warehouses, improving inventory accuracy, inbound/outbound scheduling, and operational efficiency.
- Negotiated contracts and freight rates with global carriers to reduce delivery costs and optimise transport timelines.
- Analysed logistics performance data to identify bottlenecks, improve KPIs, and streamline end-to-end workflows.
- Supported business development initiatives, contributing to the acquisition of new international clients and expansion of the service portfolio.

Operations Specialist

Kuehne & Nagel, Bogota, Colombia | Feb 2005 - Jan 2006

- Oversaw international logistics operations and process optimisation for major corporate clients, improving efficiency and accuracy in shipment coordination.
- Supported the rollout of the KN internal logistics tracking system, driving adoption through staff training and documentation and contributing to a 40% improvement in shipping data accuracy.
- Coordinated international freight across air, sea, and land transport, managing customs documentation, regulatory compliance, and real-time tracking.
- Chaired the Occupational Health and Safety Committee, leading compliance initiatives and promoting workplace safety standards across the branch.

Customer Service Specialist

Kuehne & Nagel, Bogota, Colombia | Jan 2003 - Dec 2004

- Coordinated import and export operations for domestic and international clients, ensuring shipment accuracy, compliance, and timely delivery.
- Acted as primary client liaison, providing proactive communication, real-time updates, and resolution of shipment-related issues.
- Prepared and validated logistics and customs documentation, maintaining compliance with international shipping and trade regulations.

EDUCATION

Bachelor of Cyber Security

Victoria University, Sydney, Australia | 2023 - 2026

Graduated with a Distinction average (WAM 73.58, GPA 5.96 / 7.0). High Distinctions in IT Capstone Project 1 and 2, Cyber Security Essentials, Virtualisation in Computing, and Small IT Business.

Advanced Diploma of Leadership and Management

Australian Pacific College, Sydney, Australia | Aug 2016 - May 2018

Bachelor of International Trade and Logistics Management

Uninpahu University, Bogota, Colombia | Feb 2003 - Oct 2007

CERTIFICATIONS

- Google Cybersecurity Professional Certificate
- Google IT Support Professional Certificate
- IBM Full Stack Software Developer Specialization
- IBM Front-End Development Specialization
- IBM Back-End Development Specialization
- IBM Full-Stack JavaScript Developer Specialization
- IBM Developing AI Applications with Python and Flask
- IBM Python for Data Science, AI & Development
